

QMS LED Series

Custom fabricated mounting solution for direct view LED displays. The QMS LED wall mount is constructed from high quality aluminum extrusions and features robust engineering. Critical components are factory assembled to maintain precision tolerances and minimize onsite installation time.

Technical Features

- Fine and coarse adjust on vertical mounting rails
- Focal adjustment
- Landscape and portrait options
- Multiple adjustment points to allow for mounting on irregular, out of plumb walls and columns
- Adjustable wall brackets allow airflow and wiring behind the screens
- Includes all assembly hardware (strut rail not included)
- Compact packaging for service elevator access
- Available in all configurations and sizes
- Factory assembled components reduce installation time

Accessories

- Trim kits
- Integrated cooling fans and controllers
- Customization available to accommodate convex, concave or combination wall scenarios
